

“The Inclusion program has helped them a lot and helped us a lot. We knew the Inclusion program would allow for one-on-one staff to be with the kids, take them out for the breaks they need, give them the sensory time they need.

I have seen the boys interacting with each other more safely. They are more kind, patient, and respectful after being involved in the Inclusion program.

If we didn't have the Inclusion program, one of us would have to continue being a stay at home parent. The program allows us to have much needed break time. We're better parents because of the program.”
